

QUALITY COMPLAINT REPORT - PHARMACURE LABORATORIES

Complaint Information

Complaint Reference: QC-2025-1204

Date Received: 2025-08-20

Priority: High

Category: Manufacturing Defect / Product Quality

Reporter Information

Name: Jennifer Wu

Title: Quality Control Manager

Organization: PharmaCure Laboratories

Phone: (555) 987-6543

Email: jennifer.wu@pharma-cure-labs.com

Product Information

Product: Neurocalm 25mg Tablets

NDC: 12345-678-90

Lot Number: PC-2025-3391

Manufacturing Date: 2025-07-01

Expiry: 2027-06-30

Batch Size: 200,000 tablets

Complaint Description

During routine quality inspection, approximately 15% of tablets in Lot PC-2025-3391 exhibit uneven coating. The coating appears thinner on one side of the tablet. This may affect dissolution rates and bioequivalence.

Visual inspection shows mottled appearance on affected tablets.

Standard coating thickness specification: 50-80 microns

Affected tablets measured: 25-45 microns (below specification)

Impact Assessment

- Product distributed to: 3 hospital pharmacies, 12 retail outlets
- No patient adverse events reported to date
- Remaining inventory under quarantine
- Severity: Moderate (potential efficacy impact)

Investigation Findings

Root Cause: Coating pan temperature fluctuation during production run on 2025-07-01. Temperature controller showed intermittent drift of +5C above setpoint.

Contributing Factors:

1. Preventive maintenance overdue on temperature controller
2. Operator did not notice alarm threshold breach
3. In-process checks did not include coating thickness

Requested Action

1. Root cause investigation - COMPLETE
2. Recall assessment - NOT REQUIRED (contained to quarantined stock)
3. Corrective action plan:
 - a. Recalibrate all coating pan temperature controllers
 - b. Add coating thickness to in-process checks
 - c. Retrain operators on alarm response
4. Corrective action due within 30 days
